NYK Group Companies

- NYK

Since its establishment in 1885, NYK has provided safe and high-quality transportation services by making use of its world's largest fleet and global network, which extends to sea, land, and air.

In the offshore wind business, the company is in discussions to own and operate a jack up vessel together with Van Oord in the Netherlands. The company is also discussing joint development and operation of a crew transfer vessel (CTV) with Northern Offshore Group in Sweden. By taking advantage of the knowledge accumulated in the shipping and logistics businesses to date, NYK is also considering participation in other offshore wind-related projects, thus positioning the company to contribute to the development of offshore wind power in Japan through the use of European knowledge and experience from overseas partners.

- NYK Bulk & Projects Carriers Ltd.

NYK Bulk & Projects Carriers Ltd. operates approximately 45 MPP vessels, two deck carriers, and approximately 110 bulkers, and is responsible for transporting a wide variety of cargo, including project cargo such as wind turbines, plant cargo, steel materials, and bulk cargo. In the MPP & Heavy Lift vessel division, the company provides services worldwide as the only Japanese shipping company to operate heavy lifters and deck carriers.

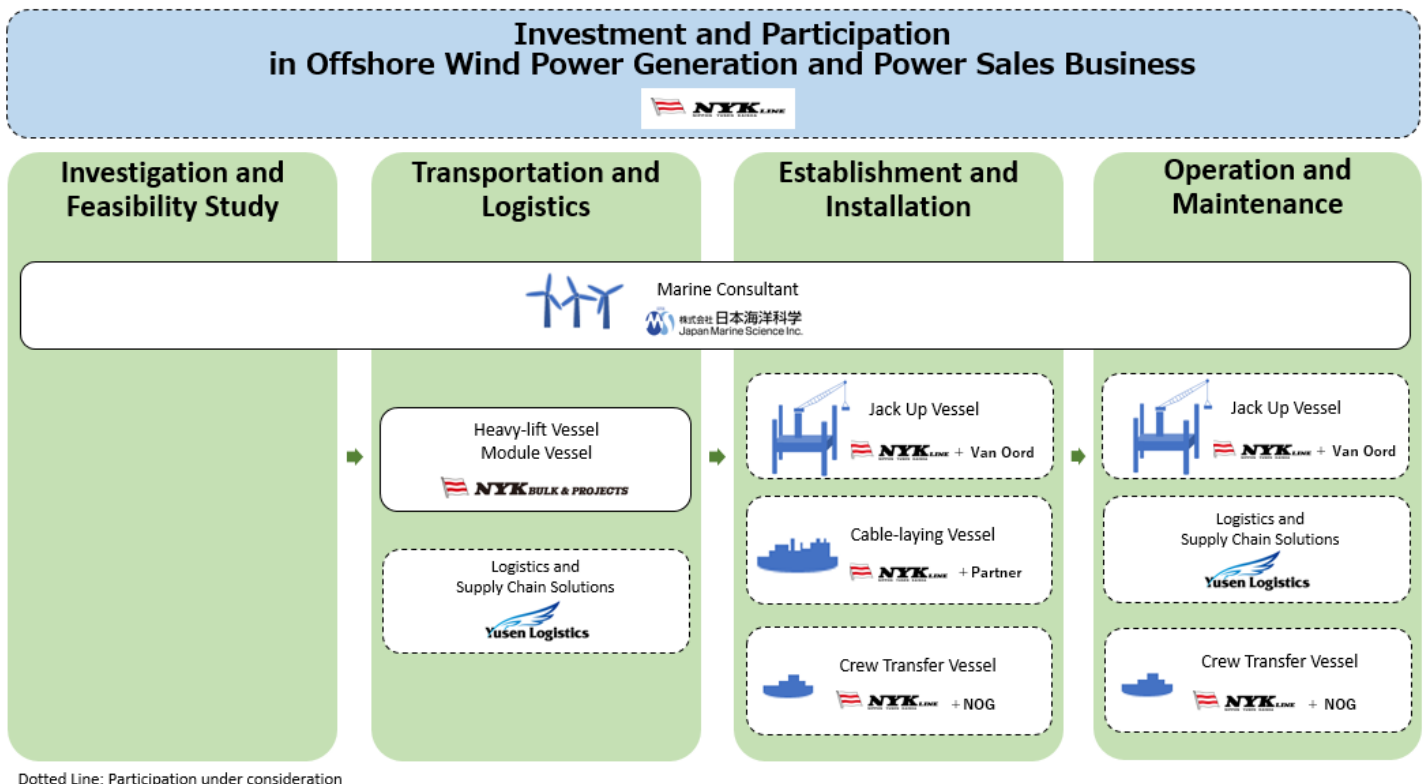

- Japan Marine Science Inc.

A maritime consulting company that conducts safety and environmental assessments of ports and marine infrastructure. For offshore wind power generation projects, the company offers surveys to consider environmental and social conditions before determining a suitable location for the installation of wind turbines, as well as business support in other areas, such as wind turbine specifications. Taking advantage of its ship handling simulator, the company also provides safety measures for ship operations during the installation of the wind turbines. Training for maintenance and inspection after installation are also offered as a comprehensive consultation service to meet customer needs.

- Yusen Logistics Co. Ltd.

A supply chain logistics company that provides ocean and air freight forwarding, warehousing, distribution services and supply chain management globally.. Utilizing a network of more than 550 offices in 46 countries and regions around the world, more than 24,000 employees provide optimal and suitable solutions for diverse and complicated demands of customers. The company will introduce logistics services for offshore wind turbine parts, and the supply chain management system "Yusen Vantage Performance," which enables customers to pick from an integrated suite of IT solutions - from the provision of end to end supply chain visibility to optimization, prediction and compliance functionality.

The NYK Group's Service Scope for Offshore Wind Power

The NYK Group is dedicated to achieving the SDGs through the group's business activities and will continue its efforts to contribute to the renewable energy business in Japan and overseas.
