

YUSEN LOGISTICS HAS A VACANCY FOR A:

## WMS APPLICATION SPECIALIST

DEFAULT LOCATION: BELGIUM - NETHERLANDS

Yusen Logistics is a worldwide logistics supplier offering air/ocean freight forwarding, distribution, storage, warehousing and supply chain management services.

Yusen Logistics Benelux has offices in the Netherlands, Belgium, Luxembourg and Sweden. In total more than 750 people work for Yusen Benelux.

**As a member of the WMS applications team, you will be responsible for:**

- Implementing the Yusen standard WMS system Manhattan SCALE. This can be a new implementation, a change or a migration from a legacy system to the standard system.
- Creating operational reports supporting the warehouse operation and customer. Reports are made using Microsoft SSRS.
- Translation of business owners' requirements into a technical report design.
- Configurations of the warehouse management system.
- Liaising with development or integration teams when necessary to provide the input they need to create interfaces / enhancements / SQLs / EXIT point's etc.
- Test and validate reports, functional enhancements or configuration changes.
- Performing system testing and providing support during user acceptance testing.
- Evaluation of new SCALE versions.
- To train business key users and application support.
- Troubleshooting incidents.

**We are looking for:**

An enthusiastic colleague who will reinforce our team and possesses following qualities:

- You have a good knowledge of warehouse processes and have built up a comprehensive a first practical experience administering and configuring warehouse management systems.
- Creating reports using Microsoft SSRS is one of your competences.
- You are a hands-on team-player with strong analytical skills.
- You have good communication skills in Dutch and English both spoken as written.
- You are willing to travel between BE and NL Yusen Benelux locations.
- You work in a structured way following project management principles.
- SQL has little secrets for you and you know your way around databases, by preference SQL Server / Azure SQL.
- You have a basic understanding about EDI and interfaces.
- Proven experience with Scale WMS (Manhattan Associates) is considered an advantage.
